

denovoMATRIX is a dynamic startup, focusing on the development and production of biomaterials for industrial manufacture of stem cells. Our vision is to enable biology in vitro and tackle the key bottlenecks in cell manufacturing in various fields. With our technology we can make a difference in cell quality, quantity, and safety. We are currently looking to expand our expertise and capabilities. The new team member will be responsible for supporting our cell culture and service team.

We are looking for a

Technician in cell culture (m/w/d)

in part-time or full-time

Your responsibilities:

- Covering daily tasks in lab maintenance and supply management
- Cell culture routine tasks (expansion, passaging, sampling, freeze & thaw)
- Application of analytical methods (imaging, FACS)
- Execution of quality control tasks according to established SOPs
- Support of service and development projects
- Reporting

Your profile:

- Trained technician in biology or chemistry or a equivalent degree preferentially combined with relevant professional experience in the life science field
- Solid knowledge in stem cell biology and cell culture
- Experience with culture of Mesenchymal Stroma Cells, additional experience with iPSC preferred
- Consistent and sustainable working style
- Fluent spoken / written English and German.

Our offer:

- We offer a unique work environment – dynamic, innovative and engaging with a team-oriented atmosphere.
- A high degree of flexibility and opportunities to engage and contribute to the company development on multiple levels
- Support to develop and grow into lab management position
- An attractive remuneration commensurate with academic positions

If this sounds interesting to you, please apply until 10.12.2021 at jobs@denovomatrix.com. Preferred starting date would be ASAP. Please feel free to contact us with further questions.
